Table 2: Company Information and Financial Strength

Line Item	Question	Response *
10	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	Federal Contracts Corp is a Certified Small Business, HUBZone, and Service-Disabled Veteran Owned Business founded in 2003. Our mission is to create quality contracts between government agencies and construction equipment manufacturers. We represent approximately 30 equipment manufacturers on cooperative, federal and military contracts. Caterpillar, Felling Trailer, Mack truck, Manitowoc cranes, and Polaris are just a handful of the companies we represent. FCC has a long history with NJPA and now Sourcewell. In fact, FCC had the very first NJPA contract. In 2018 our CEO, Clark Ricke, was recognized at H2O as a "Distinguished Difference Maker". Today, FCC is widely recognized as one of the leading contracting agencies with the General Services Administration and the Defense Logistics Agency. Signal Power, LLC began as a company manufacturing diesel driven pumps in 2001. Over the years it has evolved into an innovative next gen LED lighting company. Signal Power, LLC currently serves federal and military agencies designing and manufacturing HYBRID light towers and specialty LED lighting fixtures. These towers are capable of use as radar, air quality monitoring, mass notification, signage, gunshot detection, power generation, as well as many other applications.
11	What are your company's expectations in the event of an award?	FCC and Signal Power expect to serve Sourcewell members with next-gen lighting solutions and well as subcategory applications for radar, air quality monitoring, gunshot detection, video surveillance, etc. Sourcewell will be our first and best solution for cooperative purchasing. We are excited to bring to Sourcewell members the same next-gen lighting that is currently being designed and produced for the Navy and the US fighting soldier on our pending Defense Logistics Agency contract.

12	Demonstrate your financial strength and stability with meaningful data. This could include such items as financial statements, SEC filings, credit and bond ratings, letters of credit, and detailed reference letters. Upload supporting documents (as applicable) in the document upload section of your response.	Federal Contracts Corp has never touched our open line of credit, we are solvent and profitable. We are a brick-and-mortar business with a robust sales staff and overall headcount of approximately 22. We have exceeded our previous year of business every year since our founding. Attached are multiple letters of reference, as well as a document from Bank of America attesting to our financial strength.
13	What is your US market share for the solutions that you are proposing?	The HYBRIDTOWER being proposed is extremely unique in the light tower market with three patents containing 52 claims. These patents have now been in place, from patent pending to full patent, for over nine (9) years. The HYBRIDTOWER is the next generation in the evolution of the light tower. This being said, market share for a "hybrid" light tower should be nearly 100%, yet very small when compared to the traditional diesel market.
14	What is your Canadian market share for the solutions that you are proposing?	The HYBRIDTOWER being proposed is extremely unique in the light tower market with three patents containing 52 claims. These patents have now been in place, from patent pending to full patent, for over nine (9) years. The HYBRIDTOWER is the next generation in the evolution of the light tower. This being said, market share for a "hybrid" light tower should be nearly 100%, yet very small when compared to the traditional diesel market.
15	Has your business ever petitioned for bankruptcy protection? If so, explain in detail.	No, we have never petitioned for bankruptcy protection.
16	How is your organization best described: is it a manufacturer, a distributor/dealer/reseller, or a service provider? Answer whichever question (either a) or b) just below) best applies to your organization. a) If your company is best described as a distributor/dealer/reseller (or similar entity), provide your written authorization to act as a distributor/dealer/reseller for the manufacturer of the products proposed in this RFP. If applicable, is your dealer network independent or company owned? b) If your company is best described as a manufacturer or service provider, describe your relationship with your sales and service force and with your dealer network in delivering the products and services proposed in this RFP. Are these individuals your employees, or the employees of a third party?	Federal Contracts Corp is an authorized distributor/reseller for Signal Power, LLC. FCC has been asked to represent Signal Power, LLC regarding Sourcewell. FCC is independently owned and operated. An authorization letter from Signal Power to represent Signal Power, LLC has been attached.
17	If applicable, provide a detailed explanation outlining the licenses and certifications that are both required to be held, and actually held, by your organization (including third parties and subcontractors that you use) in pursuit of the business contemplated by this RFP.	There are no required licenses or certifications for the light tower being proposed.

If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	The pricing in this proposal is line-item pricing per machine. Additionally, there is line-item pricing for a wide variety of options. Each of these line items and options have a suggested list price. The pricing employed is a discount from MSRP. Sourcewell members will receive a 15% discount from the suggest list price. A copy of the pricing in Excel format has been submitted in the document upload section of our response.
58	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	The pricing in this proposal is a discount from MSRP. Sourcewell members will receive a 15% discount from the suggest list price.
59	Describe any quantity or volume discounts or rebate programs that you offer.	The pricing offered is the best and last pricing available. We will not force Sourcewell members to buy in quantity to receive our best pricing. There are no quantity or volume discounts nor rebate programs.
60	Propose a method of facilitating "sourced" products or related services, which may be referred to as "open market" items or "nonstandard options". For example, you may supply such items "at cost" or "at cost plus a percentage," or you may supply a quote for each such request.	Request for open market "sourced" items can be added to quotes at Sourcewell members requests. The pricing model for these items will be "cost plus". Acceptance of the quoted sourced non-standard items is at the discretion of Sourcewell members.
61	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	There are no additional charges associated with this proposal other than freight and delivery.
62	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	All shipping will be quoted at the time of Sourcewell member quotation request. This shipping will be FOB origin from Chatanooga, TN. Shipping, freight and/or deliver will be shown on every Sourcewell member quote. Freight, shipping and/or delivery will be agreed upon prior to Sourcewell member order placement. There will be no surprise charges. A flat rate charge to locations in both Florida and Washington state would be artificially high to cover cost. Quoting freight for each quote individually ensures the lowest possible cost in real-time.
63	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, and US territories. Shipping will be addressed on an individual basis for shipments to these areas. Shipping will be FOB origin from Chatanooga, TN. All freight and delivery charges will be shown on quotes prior to Sourcewell member order placement.	We propose to support Alaska, Hawaii, and US territories. Shipping will be addressed on an individual basis for shipments to these areas. Shipping will be FOB origin from Chatanooga, TN. All freight and delivery charges will be shown on quotes prior to Sourcewell member order placement.
64	Describe any unique distribution and/or delivery methods or options offered in your proposal.	Many times, for multiple unit orders, Signal Power will send the president and founder himself for product familiarization.

Table 13: Audit and Administrative Fee

Line Item	Question	Response *
66	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell. Provide sufficient detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template.	Federal Contracts Corp holds multiple General Services Administration contracts as well as Defense Logistics Agency contracts and federal BPA's (Blanket Purchase Agreements). We consistently achieve very high CPAR ratings (Contractor Performance Assessment Rating). For all our contracts, we have multiple layers of self-auditing to ensure compliance. Our internal point of contact for this contract will be required to document all sales on this contract. This documentation will be audited by our internal master contract manager overseeing all government contracts. A final audit will take place with the accounting team who will provide an additional check to ensure compliance. These layers ensure we comply with all required certifications, regulations, and modifications for our federal and defense contracts. We will employ this same method for our potential Sourcewell contract.
67	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	We currently work closely with our manufacturer, Signal Power to track our sales and success to federal and military agencies. We measure number of quotes, quote win rate, as well as awarded quote win rate. We will set goals for these metrics and track our performance to goal.
68	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor's sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member's cost of goods. (See the RFP and template Contract for additional details.)	We propose a 1.5% administrative against all whole good sales and option sales.

69	Provide a detailed description of the equipment, products, and services that you are offering in your proposal.	<p>The base products that are being offered in this proposal are light towers. However, based on patents and design, these light towers offer a multitude of configurable options to become other products. For example, the mast can be quickly and easily outfitted for signage. Imagine the ability to create a portable 30-foot-tall billboard. This feature is patented and only available from Signal Power.</p> <p>Additionally, the HYBRIDTOWER can support a wide variety of electrical applications. This is done with "quick attach" and do not require special tools or fittings. Some of these special applications include.</p> <ul style="list-style-type: none"> Video surveillance capabilities Mass emergency notification Air quality monitoring capabilities Radar (does not require special fitting) Gunshot detection <p>The latest technological advance is a Mesh Networking WiFi system with single step backhaul capabilities of up to 15 miles (can be extended with additional jumps). This system was developed in conjunction with the University of Tennessee, the State of Tennessee, and Signal Power.</p> <p>The HYBRIDTOWER system is a light tower at its base function. Signal Power light towers greatly expand, at a fraction of traditional costs, the ability of Sourcewell members to procure products that serve the SLED channel.</p>
