Digi International			10% discount off MSRP on all products	
Mobile Mark			10% discount off MSRP on all products	
		OYNTING Antennas design & manufacture technically excellent wideband antennas for 3G, 4G, 5G, LTE and WIFI. POYNTING is one of the world's leading innovators of antenna products and owns more than 50 patents and designs, used widely in its unique antenna solutions.		
Poynting Antenas			10% discount off MSRP on all products	
NHaaS Price Notes: - Minimum five (5) year commitment - Final unit quantities per building depend on building construction, geometry and user capacity requirements. - Final design and building pricing will be determined by MCA. - Onsite support negotiated on a per project basis. - NHaaS works with AT&T and T-Mobile devices that are CBRS compatible. No changes are required on the end user device. * NHaaS solution was tested and certified by InfiniG with Verizon at Meta (Facebook) but is not yet generally approved by Verizon for new locations.		Private Wireless Networks Price Notes: - Services, support and Nokia Wavesuite optical switching management software quoted and discounted on a per project basis. - Ancillary materials (eg. antennas, mounts, jumpers, SFP/XFPs, etc) quoted and discounted on a per project basis. - Discounts subject to change based upon manufacturer pricebook changes.		
NHaaS Pricing examples by building density:				
100k Sq Ft Bldg	Coverage Units	One-time Cost	Service Units	Annual Cost
Building density enabling 4100 sq ft coverage per radio	12	\$191,250	40	\$53,125
150k Sq Ft Bldg	Coverage Units	One-time Cost	Service Units	Annual Cost
Building density enabling 8300 sq ft coverage per radio	10	\$159,375	18	\$23,906
