Contracting Opportunity

Title: REQUEST FOR PROPOSALS

Agency: Sourcewell

Division: Procurement Department

**Contract
Number:** RFP #080824

CR Number: 2111089

Contract Term: 4 Years

Date of Issue: 06/20/2024

Due Date/Time: 08/08/2024 4:30 PM
Central Time

County(ies): All NYS counties

Classification: Facilities, Maintenance, Repair & Building Operations - *Commodities*

**Opportunity
Type:** General

Entered By: Tara Wolff

Description: Sourcewell, a State of Minnesota local government unit and service cooperative, is requesting proposals for HVAC Systems with Related Products and Services to result in a contracting solution for use by its Participating Entities. Sourcewell Participating Entities include thousands of governmental, higher education, K-12 education, nonprofit, tribal government, and other public agencies located in the United States and Canada. A full copy of the Request for Proposals can be found on the Sourcewell Procurement Portal [<https://proportal.sourcewell-mn.gov>]. Only proposals submitted through the Sourcewell Procurement Portal will be considered. Proposals are due no later than August 8, 2024, at 4:30 p.m. Central Time, and late proposals will not be considered.

Service-Disabled Veteran-Owned Set Aside: No

MLB game at Rickwood Field a seminal moment

Bob Nightengale
Columnist
USA TODAY

BIRMINGHAM, Ala. – This is where Willie Mays was born, raised and launched his Hall of Fame baseball career.

This is where the Birmingham Black Barons played in the Negro Leagues, the only league that permitted Mays to play professionally.

This is where Martin Luther King Jr. preached at the 16th Street Baptist Church.

This is where four little girls were killed on a Sunday morning in a bombing by the Ku Klux Klan.

This is where the Civil Rights Movement crested in the most segregated city in the country.

This is where white supremacist Bull Connor turned police dogs and high-powered fire hoses on peaceful protesters.

This is the home of 114-year-old Rickwood Field, the oldest professional baseball park in the United States, where the Black Barons played and racism could be forgotten for at least nine innings.

Now, 76 years since Mays helped lead the Black Barons to the 1948 Negro League World Series as a 17-year-old, Major League Baseball is playing its first game at Rickwood with the San Francisco Giants playing the St. Louis Cardinals at 7:15 p.m. EDT Thursday (Fox).

“This is such a blessing, I can’t believe it,” the Rev. Bill Greason, 99, one of only two living Negro League players from 1920 to 1948 and a recipient of the Congressional Gold Medal, told USA TODAY Sports. “This is a place where I grew up, and a place where so many things happened here. Blacks were not allowed to play any place around here. Blacks weren’t allowed to do a lot of things around here. There was a rich side and a poor side. I was on the poor side. But here we are, all of these years later, together, celebrating history. Thank God I’ve been able to live this long to see it.”

Greason will be honored by throwing out the first pitch.

Mays, who spent three years playing at Rickwood, died Tuesday after battling health issues for more than a year. Still, the pageantry will be powerful with Mays’ son, Michael, on hand, along with his godson, home run champion Barry Bonds; Hall of Famers Reggie Jackson, Derek Jeter and David Ortiz; and future Hall of Fame manager Dusty Baker.

The families and ancestors of those who played in the Negro Leagues from 1920 to 1948 will be on hand – with 10 families representing the Negro Leagues Family Alliance – and 59 former Negro League players will be honored.

“This is a seminal moment in Negro League history, and in many ways, this is larger than life,” said Bob Kendrick, president of the Negro Leagues Baseball Museum in Kansas City, Missouri. “We will have a collective eye of baseball world dedicated to salute the Negro Leagues. And to do it at Rickwood Field, a place with history so rich, a place where a young Willie Mays got his start with the Black Barons, what Henry Aaron did here, what Ernie Banks did, how they all validated the talent in the Negro Leagues.”

“When these players walk onto the field, they’re going to feel the spirits of those legendary stars come back through life. That’s what made the ‘Field of Dreams’ game so special in Iowa. But that was a movie with a game played on a movie set. That was a reel. This is REAL life.”

There will be tears shed in memory of

Many Negro Leagues games were played at Rickwood Field in Birmingham. JESSICA CARROLL/MLB PHOTOS VIA GETTY IMAGES

Mays, tears of the painful memories of segregation in this country and tears of euphoria with the gathering of the Negro Leagues Family Alliance, with many meetings for the first time.

“I can’t wait to meet and talk to Bill Greason,” said Sean Gibson, the great grandson of legendary Josh Gibson, considered the greatest player in Negro Leagues history. “He’s one of the only few living people who saw Josh Gibson play. I’ll get some good stories about Josh. I don’t get actual players who played against Josh, and now I get to pick his brain about my great grandfather. For me to talk to an actual person who saw my grandfather play is my highlight there.”

Gibson, co-founder of the Negro Leagues Family Alliance with the Buck Leonard family, plans to lobby MLB officials during their luncheon Wednesday about an annual Negro Leagues Day on May 2, commemorating the start of the Negro Leagues in 1920.

MLB deputy commissioner Dan Halet and Tony Clark, executive director of the Major League Baseball Players Association, are scheduled to speak and provide a substantial grant for the alliance.

“It’s going to be like a mini-family reunion,” Gibson said. “We’re celebrating this family reunion on Juneteenth and celebrate the Negro Leagues in Birmingham of all places. You can’t get any more history than this.”

There be plenty of stories flowing at the brunch, from the days of Rickwood to Pittsburgh to Kansas City to Detroit to Patterson, New Jersey.

Greason, who lived across the street from Dr. Martin Luther King Jr. in Atlanta, will reminisce about the Civil Rights Movement, winning Game 7 against the Kansas City Monarchs and leading the Black Barons into the 1948 Negro League World Series, becoming the St. Louis Cardinals’ first Black pitcher, and serving two years in the Marines during World War II.

“This was greater than baseball to be at a place called Iwo Jima and to see the atomic bomb fall in Nagasaki,” said Greason, who still preaches every Sunday at Bethel Baptist Church. “Our life was in danger and I returned without a scratch. I lost two of my best friends.”

“And here I am, still breathing at 99. I’m thankful to be able to live this long. I was blessed to play with Willie Mays, and to see Roberto Clemente, two of the

greatest players I ever saw in my life.”

Ron Teasley, 97, grew up in Detroit, played in the Negro Leagues with the New York Cubans, was signed by the Brooklyn Dodgers to play in their farm system, and met Jackie Robinson at their spring training headquarters in Vero Beach, Florida.

“My dad would take me to see those great Negro League players because we weren’t allowed to see the Detroit Tigers,” said Teasley, the first member of his family to attend college and graduate from Wayne State University. “You’d hear about Oscar Charleston and Josh Gibson and the way folks bragged about them. I had such great admiration for the Negro Leagues.”

“What impressed me so much was the love these guys had for the game. My favorite was Buck Leonard. My father’s favorite was Turkey Stearnes. My father idolized him. He came to my house one day and my father was so overjoyed he was late for work, and he was never late for work.”

Teasley’s father was worried when Teasley went to play baseball in the Deep South. Teasley had never been to the South, and when he arrived he was warned by his teammates to be extremely cautious.

“You were afraid when you got stopped by the police, so the players told me what to do,” Teasley said. “They told me you’re going to get stopped, and you better say the right terms. You better say the word ‘Sir.’ And they’re always going to ask you where you’re from.”

“When you got stopped, you told them what you’re doing there, and they’d always say, ‘Where’s Satchel Paige? Where’s Satchel?’ We’d say, ‘He’s waiting for us at the ballpark.’ Everyone knew Satchel.”

Teasley is most proud of his impact as a teacher in the world of education, while also serving in the Navy during World War II, and meeting President Barack Obama at the White House.

His greatest claim to fame as a ballplayer, he says, is hitting a triple off Paige during an exhibition game at Dequindre Park in Detroit.

“I was a utility player, and I guess I knew my place when I was supposed to start one game for the Negro League Cubans,” Teasley said. “Well, when Minnie Mino arrived, he did not bring his uniform. So, guess whose uniform they gave him?”

Teasley, who never played at Rick-

wood, always wonders how long the Negro Leagues would have flourished if the Dodgers had not integrated baseball in 1947 with Jackie Robinson, and two months later when Cleveland signed Newark star Larry Doby.

“We were kind of concerned when he signed,” Teasley said, “because we knew that pretty much meant the end of the Negro Leagues. Fans stopped coming to our games. It was a happy time, but a sad time, too.”

The Negro Leagues were never the same, but the memories will last forever, passed on to generations and generations.

The Giants-Cardinals game, with players wearing Negro League jerseys, culminates a tribute to Rickwood and the Negro Leagues. This comes in the aftermath of Negro Leagues stats being formally incorporated into MLB stats and with retirement benefits paid to all living players.

They had Play Ball clinics for local Boys and Girls Clubs and Nike RBI programs; a symposium with financial advice for Black-owned businesses; a minor league baseball game and a celebrity softball game filled with former stars.

Folks in Birmingham, with nearly \$6 million spent in renovating Rickwood Field, are hoping this becomes an annual event.

Others are hoping MLB plays this annual game in different Negro League ballparks, like refurbished Hinchliffe Stadium in Patterson, New Jersey, where Doby played, or Hamtramck Stadium in the Detroit area.

There, of course, is the eternal hope that the Rickwood Game spurs interest that could lead to an increase of Black players in today’s game. It’s appalling to think there are just as many former Negro League players from 1920 to 1948 alive (Greason and Teasley) as active Black players who will be on the field (Masyn Winn of the Cardinals and Jordan Hicks of the Giants).

Just 5.7% of all players on opening-day rosters and injured lists this year are Black, the lowest percentage since 1955, according to USA TODAY Sports’ research.

“This is a great platform, now we’re hoping there will be a lot of change after this,” said Gibson, who also is advocating for the MVP award to be named after his great grandfather.

“There have been a lot of great strides made. Now, it’s time to see more.”

Specialist hops on pommel horse in Paris bid

Tom Schad
USA TODAY

There are six events in men's gymnastics, each designed to test a different combination of athletes' strength, balance and skill.

Stephen Nedoroscik only competes in one event – but it could be his ticket to the Paris Olympics.

In a sport that generally rewards all-rounders, Nedoroscik, 25, has taken a completely opposite approach leading up to the U.S. Olympic gymnastics trials in Minneapolis this week. Since the waning days of his high school career, he has competed only on pommel horse – emerging as one of the best athletes in the world on this one apparatus, even at the apparent expense of the other five.

Nedoroscik

Where other gymnasts like Brody Malone and Frederick Richard have room to overcome a mistake in competition, Nedoroscik's entire night comes down to a 45-second pommel horse routine. Where they have strengths and weaknesses, he has a singular specialty. But it's worked. Over the past eight years, the Massachusetts native has won two NCAA titles, four national championships and a 2021 world title, all on pommel horse.

"Somebody like Stephen is a real anomaly," said Randy Jepson, who coached Nedoroscik in college at Penn State. "You don't get a lot of those guys that stand up and stick out where they're the best in the world (in a single event)."

Nedoroscik's elite ability – and obvious limitations – make him something of a wild card entering the trials, where the five members of the men's Olympic team will be decided. In the Olympic team final, three men per country compete on each apparatus and all three scores count. Nedoroscik would be unable to contribute in five of those events – but in the sixth, he is capable of putting up a score that few athletes in the world can match.

"It's a little complicated," Nedoroscik said of his Olympic chances. "But right now, the way things are looking, I think I've put myself in a pretty dang good spot here. I'm just hoping that I can go out to Olympic trials and knock out a couple more good routines. At that point, everything would be out of control. Fingers crossed I'd make it."

When he was 11 or 12, he said he decided to start going into practice early to spend one full hour doing simple one-pommel loops. About a year later, he could do more loops in a row than some of the guys who were heading off to col-

Stephen Nedoroscik easily won the pommel horse competition at this year's U.S. Gymnastics Championships in Fort Worth, Texas. JEROME MIRON/USA TODAY SPORTS

What makes pommel horse so difficult

Nedoroscik is one of three specialists competing at the Olympic trials and one of two who focus on pommel horse, the notoriously tricky apparatus that is sometimes compared to balance beam in women's gymnastics. The U.S. has historically struggled on the apparatus, and many all-rounders dread it. Jepson likened the technical requirements of the event to playing a round of golf with fairways that are 10 feet wide and putting the ball on the green every time.

"It's really challenging because you're dealing with so many different balance issues and constant motion," he said. "So as the difficulty of the skill goes up, the precariousness of keeping that balance, in motion, without any impediments and flaws to the fluidity of that motion – it's really, really important."

Nedoroscik, however, has always loved it. Though he competed in every event as a kid, and was actually best at parallel bars for a while, he said he would often drag a pommel horse training device – known colloquially as a mushroom – into the living room to show off his pommel horse skills for family members and friends.

When he was 11 or 12, he said he decided to start going into practice early to spend one full hour doing simple one-pommel loops. About a year later, he could do more loops in a row than some of the guys who were heading off to col-

lege. And by 15, his father had purchased an old pommel horse from the 1980s at an auction and set it up in the backyard.

"So when I got that, then it turned into the family coming over and I'd go show them some stuff on that," Nedoroscik said.

Why Nedoroscik went all-in on one event

That backyard practice helped Nedoroscik win back-to-back pommel horse titles at junior Olympic nationals, which in turn helped him get on Jepson's radar at Penn State. As a freshman, Nedoroscik said he intended to add other events to his competitive repertoire but soon realized that pommel horse was his avenue to competing. So he zeroed in on the event, won a national title and hasn't looked back since.

"It was kind of just a route that no one had taken before," he said. "I had no idea what was going to happen."

After graduating from Penn State with an electrical engineering degree, Nedoroscik was perhaps best known for the non-prescription goggles he wore while competing – a gift from a teammate that he has said was more about superstition than improving his eyesight. But by 2019, he had made it to the U.S. national team. And in 2021, after missing out on the Tokyo Olympic team, he became the first U.S. gymnast ever to win a world championship on pommel horse. (Peter Vidmar won Olympic gold

in the event in 1984.)

Nedoroscik said competing as a one-event specialist has its own set of challenges. At last month's national championships, for instance, he warmed up and then had to wait for more than 140 routines to take place before his one turn on pommel horse arrived.

It also comes with daunting pressure – and, for USA Gymnastics officials, a certain degree of risk.

The Olympic calculus of including a specialist

If he has a clean routine, Nedoroscik is capable of scoring above 15.000 and likely adding one or two points to the team's score, which could bump the team above one of its rivals. But if he falters, the team has essentially assumed the risk of being short-handed in case of an injury without getting any of the subsequent reward. (In Tokyo, there were only four athletes allowed per team but each country could also bring a "plus-one" athlete to compete only in individual events. The U.S. took another pommel horse specialist, Alec Yoder.)

"You want to win, you've got to be able to put the best score up. And maybe that means thinking out of the box a little bit and taking a little bit more risk," Jepson explained. "The fact that he's a one-event guy but he can make that big a difference, I think that's really key. And I think that as we've looked at the selection procedures, (they've) made it such that somebody like that can make it – but they have to be that valuable."

The U.S. is hardly the only country weighing questions about specialists ahead of the Olympic team competition, and Nedoroscik wouldn't be alone if he were to be selected. Great Britain has long relied on pommel horse specialists, most recently Max Whitlock, and China is expected to have a specialist on rings in Paris.

Ultimately, however, it's a question of risk and reward. And Nedoroscik knows that all he can do is try to impact that equation with consistent performances in Minneapolis this week – ideally by matching or exceeding his scores at the national championships earlier this summer, where he finished nearly two points higher than any of the other likely members of Team USA over two pommel horse routines.

"It does look like I have a chance," Nedoroscik said. "I think I actually have a really good chance of making that squad."

Lynx win \$500,000 WNBA Commissioner's Cup

Jordan Mendoza
USA TODAY

The Minnesota Lynx used their hot shooting and slowed down one of the best offenses in the league to beat the New York Liberty 92-89 on Tuesday to win the WNBA Commissioner's Cup.

In the first half it looked like the first-place Liberty were going to cruise toward victory thanks to a hot start from Sabrina Ionescu, but the second half was a different story. New York couldn't stop turning the ball over and Minnesota capitalized on a majority of the opportunities, turning 22 Liberty turnovers into 27 points.

Breanna Stewart engineered her own run to cut the deficit to one point in the fourth quarter, but Minnesota held off all late rallies from New York.

The Lynx showed why they lead the WNBA in 3-point shooting percentage with a whopping 14-for-29 (48.3%) performance from beyond the arc. Minnesota got big-time performances from Bridget Carleton and Napheesa Collier, who combined for 44 points and made

Lynx forward Napheesa Collier had 21 points and six rebounds and was named MVP of the Commissioner's Cup final. WENDELL CRUZ/USA TODAY SPORTS

nine of the 3-point shots for the team. Collier was named the MVP of the final.

The win is just another mark in what has been a remarkable turnaround in

Minnesota. A team that finished the 2023 season 19-21, Minnesota has now won seven games in a row, even though Tuesday's game won't count toward the regular-season standings or stats. Of those victories, only the win on Tuesday and a win over Los Angeles on June 14 were single-digit wins. At 13-3 Minnesota is tied with the Connecticut Sun for second place in the WNBA and one game back of New York.

Commissioner's Cup prize

Not only do the Lynx get to claim the Commissioner's Cup trophy, they also went home with a solid payday.

The winners of the Commissioner's Cup are awarded \$500,000, about one-third of the WNBA salary cap. With 12 players on a roster, each player will get about \$41,000, and the MVP of the game – Collier – gets an additional \$5,000.

Coinbase, the sponsor of the Commissioner's Cup, added \$120,000 in cryptocurrency to the prize pool so every player on each team will get \$5,000, so there's some prize for the Liberty.

Every team partnered with a non-profit organization decided by players for the competition and those organizations also get donations for their teams making and winning the final. The Lynx partnered with Gender Justice and the organization will receive \$10,000, and Women Creating Change will get \$5,000 from its partnership with the Liberty.

Commissioner's Cup history

The Lynx denied New York a chance to be the first back-to-back Commissioner's Cup winners in the in-season competition's young history. The Liberty won last year's edition by defeating the eventual WNBA champion Las Vegas Aces. The winners of the Commissioner's Cup:

- 2024: Minnesota Lynx (defeated New York Liberty)
- 2023: New York Liberty (defeated Las Vegas Aces)
- 2022: Las Vegas Aces (defeated Chicago Sky)
- 2021: Seattle Storm (defeated Connecticut Sun)

Description/Summary

Canoe Procurement Group of Canada, is posting the solicitation on behalf of CivicInfo BC, RMA, SARF, AMM, LAS, UMN, NSFM, FPEIM, MNL, NWTAC, NAM, AYC and its current and potential Members and represented Associations and their Members, which includes all MASH/MUSH sectors, Provincial Governments, Federal Agencies, Crown Corporations, local Governmental and other not-for-profit organizations located in all provinces and territories in Canada including but not limited to British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, Nova Scotia, New Brunswick, Prince Edward Island, Newfoundland and Labrador, Northwest Territories, Yukon Territories and Nunavut. Request for Proposal ("RFP") to result in regional and/or national contract solutions under the rules and regulations of Canadian trade agreements (including Canadian Free Trade Agreement (CFTA) Chapter 5, Ontario-Quebec Trade and Cooperation Agreement, and Canada-European Union Comprehensive Economic and Trade Agreement (CETA) Chapter 19, New West Partnership Trade Agreement (NWPTA), Atlantic Trade and Procurement Partnership (ATPP) as applicable).

Canoe/Sourcewell is requesting proposals for HVAC Systems with Related Products and Services to result in a national contracting solution for use by its members.

Members include thousands of governmental, higher education, K-12 education, not-for-profit, tribal government, and other public agencies located in Canada. A full copy of the Request for Proposals can be found on the Sourcewell Procurement Portal [https://portal.sourcewell-mn.gov]. Only proposals submitted through the Sourcewell Procurement Portal will be considered. Proposals are due no later than August 8, 2024, at 4:30 p.m. Central Time, and late proposals will not be considered.

1. Sourcewell and Canoe are seeking proposals for HVAC Systems with Related Products and Services, including all types of heating, ventilation, air conditioning, indoor air quality and water heating or treatment solutions, such as:

- a. HVAC, IAQ, geothermal, and water heating or treatment infrastructure, equipment, components, products, parts, and related technology;
- b. Sensors, smart controls, thermostats, gauges, system automation, integration equipment, monitoring equipment, software, or management products and technology; and;
- c. Services complementary to the offering of the solutions described in Sections 1. a. and b. above, including installation, maintenance, repair, refurbishment, replacement, system upgrades, efficiency measurement, energy saving performance contracting, emergency or short-term HVAC equipment rental, assessment, integration, training, support, and customization.

Proposers may include related equipment, accessories, and services to the extent that these solutions are ancillary or complementary to the equipment, products, or services being proposed.

2. The primary focus of this solicitation is on HVAC Systems with Related Products and Services. This solicitation should NOT be construed to include services-only solutions.

3. This solicitation does not include those equipment, products, or services covered under categories included in pending or planned Sourcewell solicitations, or in contracts currently maintained by Sourcewell, identified below:

- a. Ice Rink and Arena Equipment with Related Supplies and Services (RFP #120320);
- b. Facility Assessment and Planning with Related Services (RFP #020421);
- c. Facility Security Systems, Equipment, and Software with Related Services (RFP #030421);

Rev. 5/2024 Sourcewell RFP #080824 HVAC Systems with Related Products and Services Page 5

- d. Facilities Maintenance Services (RFP #062421);
- e. Commercial Kitchen Equipment, with Related Supplies and Services (RFP #063022), and
- f. Facility MRO (Maintenance, Repair & Operations), Industrial & Building-Related Supplies and Equipment (RFP #091422).

4. The term of any resulting contract(s) awarded by Sourcewell under this solicitation will be four years. Sourcewell and supplier may agree to up to three additional one-year extensions based on the best interests of Sourcewell and its Participating Entities. Sourcewell retains the right to consider additional extensions beyond seven years as required under exceptional circumstances.

5. A full copy of the Request for Proposals can be found on the Sourcewell Procurement Portal [https://portal.sourcewell-mn.gov]. Only proposals submitted through the Sourcewell Procurement Portal will be considered. Proposer's complete proposal must be submitted through the Sourcewell Procurement Portal no later than the date and time specified in the Solicitation Schedule. Any other form of proposal submission, whether electronic, paper, or otherwise, will not be considered by Sourcewell. Only complete proposals that are timely submitted through the Sourcewell Procurement Portal will be considered. Late proposals will not be considered. It is the Proposer's sole responsibility to ensure that the proposal is received on time.

6. Following submission of proposals, negotiations may be permitted.

Estimated Contract Start Date	Estimated Contract End Date	Estimated Contract Duration
Oct 1, 2024	Oct 1, 2028	3 Year(s) – 51 Week(s) – 6 Day(s)
*These estimated contract dates and duration are only estimates and subject to change.
