SIP, P25 DFSI, P25 CSSI, DMR-AIS and Kenwood NEXEDGE Direct IP licenses are used to enable existing lines in C-Soft to operate with these special interfaces. (Example: A position requiring 6 SIP extensions, 2 DFSI lines, 2 NEXEDGE lines, and 12 radios controlled by IP-224 add up to 22 lines, which would require at least a 24 line C-Soft license because the next smaller C-Soft license is only 12 lines)

### IP Adaptors - IP-224

The IP-224 is a radio gateway IP adapter for building the Telex Radio Dispatch solution. Each adapter can control two devices. Radio interface cables and/or power supply can be ordered from accessories or use power from device that is interfaced to the IP-224. Advanced interfaces option can be ordered with the unit, or as an optional field code for upgrade in the field. Power supply not included.
