11	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested Solutions.	<p>Since its inception in 1948, Vermeer Corporation has grown from a one-person Iowa operation, to an international organization that manufactures agricultural, construction, environmental, and industrial equipment. Vermeer Corporation has been in the industry since it was founded in Pella, Iowa, in 1948. Gary Vermeer once said, "Find a need. Fill that need with a product built to last. And simply build the best!" This is a guiding principle for Vermeer. Stemming from this philosophy, Vermeer provides its customers with equipment through a dedicated independent, authorized dealer network offering sales, support, service, and parts.</p> <p>Vermeer is committed to its vision of "Equipped To Do More." In the early years and shortly thereafter, Vermeer developed many "firsts" including the world's first large round hay baler, tree spade, and stump cutter. Now more than 7 decades later, Vermeer Corporation is still developing new products and is an industry market leader in brush chippers, tub and horizontal grinding equipment, composting equipment, trommel screens, trenchers, directional drills and mini skid steers. As a leading trencher equipment manufacturer, Vermeer trenching equipment has been utilized on road construction and mining projects, within the equipment rental industry, and various other job applications.</p> <p>Vermeer corporate offices and manufacturing facilities are in Pella, Iowa, U.S.A., and have 150 dealerships in the US and Canada. This includes 137 dealerships covering all the United States and 13 dealerships that cover all of Canada. The Vermeer philosophy strongly reflects the Company's character, which encompasses the solid foundation built from decisions made in the past and planning for the organization's present and future. Vermeer's 4P philosophy, Principles, People, Products and Profit, is at the forefront of Vermeer. These principles steer the hub for Vermeer. Now, Vermeer is recognized within our industry as the company that "sets" the standards for quality and customer support.</p>
12	What are your company's expectations in the event of an award?	<p>In the event the Sourcewell evaluation team determines that Vermeer is a company that can provide great value to its members and because we believe Sourcewell has its own unique attributes, we would continue our efforts in promoting the overall program. This would include continuing our efforts to design, enhance and build quality products that offers the most value over the life cycle of any given product.</p> <p>We will continue to enhance our efforts to promote the Sourcewell program, which we feel also provides great value to any existing or potential member. Vermeer would continue to put a strong focus on training; utilizing Sourcewell's assets (web training, promotional literature, contract support and the new Marketplace) and our assets (internal training links, education of sales representatives on the street with the assistance of Government Solutions Team (GST), encouraging dealers to attend Sourcewell Academies promoting Sourcewell at trade shows where Vermeer is exhibiting.</p>

Table 4: Marketing Plan (100 Points)

Line Item	Question	Response *
37	Describe your marketing strategy for promoting this opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	<p>Vermeer's priority for marketing this contract will be to enable and empower our dealer sales force through education and awareness. Our dealers will be the primary source to build customers' awareness of this Sourcewell contract and procurement method. We have dedicated training programs and support efforts in place to continually improve our dealers' understanding, embracement, and success of our Sourcewell contracts.</p> <p>Digital marketing is also a priority for Vermeer. Since 2016, Vermeer has proudly included a section within our website dedicated to describing the benefits of (NJPA) Sourcewell, cooperative purchasing and promoting Vermeer's inclusion in the Sourcewell family of awarded vendors. We reference resources directly from Sourcewell to support this content, including the "The Sourcewell Advantage" video to quickly describe the benefits and to build awareness and comfort for the viewers.</p> <p>Additional digital marketing efforts include adding details of the benefits of utilizing Sourcewell into our geotargeting tactics. This gives us the ability to direct advertising on individual electronic devices (advertising you see on Facebook, Google, etc.) based on the location of the electronic device. An example of current geotarget locations include the 20 miles around specific dealerships. When someone comes within those 20 miles they will begin seeing Vermeer advertising on their cell phone. The advertising produced in the geotargeting marketing tactic will direct viewers back to the dedicated Sourcewell landing page on Vermeer.com. In developing the page content for Vermeer.com, we utilized strategic keywords based on common terminology around the cooperative buying process. By including this in our page copy, it will help to capture the audience searching for cooperative buying solutions on equipment buying and drive that search traffic to this page.</p> <p>https://www.vermeer.com/na/equipment/financing/government-solutions</p> <p>In addition to the dedicated page currently on Vermeer.com for Sourcewell information, Vermeer includes information on each specific product page for applicable models to direct customers back to the Sourcewell page on Vermeer.com. This will increase awareness of not only Sourcewell, but let customers know during their research phase that the model can be purchased through a Sourcewell contract.</p> <p>Vermeer dealers also offering customer lunch and learns, regional events and Government Solutions Team speaking events on purchasing through Sourcewell vs. going to bid.</p> <p>See Document: Marketing</p>
38	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	<p>As mentioned above, we have a significant Sourcewell presence on Vermeer.com and will continually monitor our effectiveness in driving traffic to our pages through search engine optimization (SEO). Our internal digital marketing team is continually increasing our search engine marketing efforts, and will begin adding more Sourcewell and public sector cooperative purchasing terms into our ad sets moving forward to further increase awareness. In addition, we will also use our primary social channels (Vermeer Environmental Facebook page with over 60,000 followers, Vermeer Industrial Instagram page with over 20,000 followers) to further drive awareness of our Sourcewell contract. We will continue to share customer's stories highlighting those customers that have utilized Sourcewell contracts to purchase their Vermeer equipment. We are also actively working on better aligning with our sales team to be alerted of products purchased through the Sourcewell contract so we can look for more opportunities to share more stories throughout the year. Within our blogs, we can tag these customer stories with Sourcewell terminology to make it easier to search for and raise awareness; then link to these stories to our informational page on Vermeer.com enhance credibility.</p> <p>As an example, Vermeer featured a customer story on our blog and shared to our Facebook page using a formerly NJPA, now Sourcewell contract. This post reached over 12,000 people, received over 130 likes and was shared 17 times. As we continue to hear of customers who take advantage of the Sourcewell opportunity with Vermeer, we will continue to endorse those stories on our social channels and utilize them as testimonials to the value of purchasing Vermeer equipment through Sourcewell.</p>

39	In your view, what is Sourcewell's role in promoting agreements arising out of this RFP? How will you integrate a Sourcewell-awarded agreement into your sales process?	<p>Vermeer views Sourcewell as the industry leader within the Cooperative Purchasing industry, which is the role we desire Sourcewell to maintain. We look to Sourcewell to continue to build awareness and acceptance among public procurement professionals, and we appreciate the tradeshow presence that Sourcewell has been committed to providing.</p> <p>We also look to Sourcewell to keep the vendor community informed on pending legislation, as well as any legal challenges relating to cooperative purchasing across US and Canada. The information provided on sourcewell-mn.gov is a helpful resource for both members and vendors, and to promote our contract and display current information on a Vermeer landing page. The contract administrator and contract administration specialist roles at Sourcewell are invaluable to the vendor from the Contract Launch and VBM to the report requests and weekly membership updates. We look to the contract administrator for assistance when we need government-to-government conversations, additional training whether it be a University, Sales Accelerator event or a vendor training event. In addition to all the support provided through trade shows and overall passion for Sourcewell, Vermeer will do its part through utilizing these great people resources and building upon existing relationships. We will promote the services that they provide to our dealership network. We will utilize the Sourcewell marketing materials at applicable trade shows. At Vermeer, our Sourcewell contracts are placed as our main go-to-market strategy in the public sector. We have integrated Sourcewell into our company culture and continue to invest in training and support resources available to and for our dealers.</p> <p>Along with a dedicated internal governmental department, Vermeer has partnered with GST - Government Solutions Team, LLC as an additional support resource. GST specializes in providing factory sponsored, focused efforts to increase dealers' confidence and competency related to Sourcewell, and travels out in territories to encourage and mentor salespeople and governmental fleet customers about Sourcewell. GST helps support and creates partnerships our dealers. This also includes helping overcome customers' objections to using Sourcewell as a buying method. Our investment in GST is another example of Vermeer's commitment to doing all we can to make our Sourcewell contracts successful.</p> <p>In 2025, Vermeer has established a Government Advisory Board and team of Government Champions within each dealership. This step allowed Vermeer to increase dealer engagement in Sourcewell business and host the first Vermeer Government Forum to discuss strategy, market knowledge and the benefit of pursuing the public market.</p>
40	Are your Solutions available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	<p>Vermeer continues to explore the feasibility of implementing an E-procurement and E-Marketplace system.</p>

41	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	<p>Vermeer provides product training for operation and maintenance on our entire product line. The training is standard and is included with each new product delivered. Local dealers will conduct overview sessions or one on one reviews with operators. New product introductions and training programs are performed on a regular basis, for both existing and prospective customers. Offering localized ongoing training and support is another benefit of having long term dedicated dealers and specialists throughout the United States and Canada.</p> <p>Additional extended trainings are provided at the member's cost from the local dealership. This is based on the time of the extended training.</p>

<p>42</p>	<p>Describe any technological advances that your proposed Solutions offer.</p>	<p>Vermeer is considered to be the innovator within the industry creating newer, more efficient products. We are continuously developing environmental and economic features in our products. Each product has its own features and benefits. Life cycle costs and safety are the key drivers used during the engineering and enhancement of all our products. Vermeer has designed many safety features into our products and makes them standard, not optional, features in all our products. The Vermeer website provides extensive product information and can be cross referenced by equipment type, i.e., construction or environmental and by industry including Utility. This provides the members with information that is specific to their application and helps make the purchasing decision more efficient. A local Vermeer dealer can be located using the 'Dealer Locator" feature on www.vermeer.com.</p> <p>Vermeer is presently working on adding telematics on all Vermeer vac products. This project should be completed at the end of the 2026 year. All new products will incorporate telematics moving forward. Vermeer is also on the cutting edge of incorporating our software into our vac truck products to allow for simplification of engaging our truck PTO system. This allows for ease of use within our truck vac lineup for training, diagnosing, and operating our systems.</p> <p>Vermeer utilizes GovWin through Deltek to identify equipment on future budgets. This information is shared with the dealers so they can connect with the customer to see if the equipment can be purchased through Sourcewell and even moved up in the budget cycle with municipal leasing. Government Solutions Team also offers an app called "GovProspect" that provides customer locations on a map and relevant Sourcewell information. Vermeer also offers simulators for customers to train on how drills are operated. Many dealers now have a dedicated training room that can accommodate larger groups of customers for training events.</p>

<p>43</p>	<p>Describe any “green” initiatives that relate to your company or to your Solutions, and include a list of the certifying agency for each.</p>	<p>Energy Reduction and Waste Management is ingrained in the Vermeer culture and processes. An 870kW solar field was installed and in operation in 2016 which will provide approximately 5% of Vermeer's total electrical usage.</p> <p>Lighting technology has been upgraded in several locations to energy efficient LEDs as well as motion sensors and variable lighting depending on the time of day and natural light.</p> <p>Resource Conservation is achieved in three ways, Reduction, Reuse and Recycling. Multiple resource conservation initiatives have been implemented both internally and externally to positively impact each of these conservation mechanisms. At least 76% of Vermeer's waste is recycled. About 3000 pounds of organic waste is composted every month. Since a 2006 baseline year, Vermeer has reduced water usage by 40 percent.</p> <p>Pollution Prevention - Vermeer has implemented multiple layers of pollution prevention mechanisms across our campus to minimize risk of environmental pollution from our operations. Recent additions include: Our manufacturing and assembly factories have been upgraded with state-of-the-art steel cutting laser equipment and emission filtration devices which have resulted in a 42 percent decrease in particulate air emissions. All shot blasting of parts and machines is done in an enclosed area and controlled with pollution control equipment. Vermeer utilizes LEAN manufacturing principles and promotes Kaizen training and events to reduce waste and build efficiencies in the manufacturing process.</p> <p>Community Outreach - is the very essence of what environmental stewardship is about. Examples of Vermeer's Community outreach efforts include annual waste collection days during Earth Day for the local community. Environmental education grants Environmental Educational Tours and Programs (Teachers / Students / Community) Support volunteerism for disaster clean-up and recovery efforts Environmental Internships Partnerships with colleges for technical educational programs that benefit the environment.</p> <p>Vermeer is driven to support our customers, local communities, and global nations, with exciting new products that enable them to be successful in the current and newly emerging recycling and resource conservation markets such as: Bio-waste conversion to energy and ethanol Geothermal applications Wind energy Water quality Waste processing and composting.</p> <p>Vermeer products are currently being used to install and maintain emerging alternative energy sources which reduce our reliance on fossil fuel power.</p> <p>Horizontal directional drills are being used to help install loops for residential geothermal heat pump systems, while trenchers and directional drills are helping to bring wind energy from the farm to the grid. For the installation of commercial solar fields, Vermeer offers a solution in the PD10 pile driver for fast, easy installation of solar panels. Innovations in Vermeer products help reduce environmental impact.</p> <p>Vermeer puts environmental stewardship into the design and manufacturing of its products. Some recycled steel is being used in our products, and we're exploring ways to integrate more recycled plastics and rubber components. Vermeer has also made a conscious effort to begin incorporating engine hoods and shields made from recycled ABS plastic into some of our product designs. In addition, our manufacturing and assembly factories have been upgraded with state-of-the-art steel cutting laser equipment and emission filtration devices which have resulted in a 42 percent decrease in particulate air emissions.</p> <p>Future Goals - Our continued efforts to minimize waste and conserve natural resources will ensure our operations remain environmentally sustainable. The focus will be: Continue to focus on energy improvements to meet or exceed our 25% goal for reduction in electrical usage. Complete a water usage analysis and set new goals for reductions and reuse. Develop a longer-term sustainability process by reviewing and selecting a sustainability partner or tool to help plan and drive our next steps.</p> <p>Vermeer hydro vacs have begun to incorporate the use of Jurop blowers into our model lineup. Jurop blowers are a helical-style blower. The helical-style blower allows the operators to run at a much lower rpm level while maintaining high efficiency rates. Because we run at a much lower rpm level, there is a much lower decibel level. Vermeer recently launched some electric models and are working towards additional options in the Utility market.</p>
<p>44</p>	<p>Identify any third-party issued eco-labels, ratings or certifications that your company has received for the Solutions included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.</p>	<p>Not available</p>

45	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	<p>Vermeer Corporation celebrates 7 decades of manufacturing. From modest beginnings, quality product innovations and demand has allowed the company to expand offering in more than 60 countries. Our full line is considered the innovator of quality products and safety within the industry. Vermeer takes safety very seriously with our equipment innovation. It is very important that Vermeer equipment offers the safest possible experience for the user and eliminate risk of injury whenever possible. The reputation of the Vermeer brand allows for typically higher resale of used equipment bringing more value to the governmental agency.</p> <p>Vermeer's product support is among the best in the industry, enabling the equipment investment to last longer, again adding value. Vermeer implements a training program for customers helping to maintain a safe work environment for the operators. Vermeer is the only supplier that can offer such a wide variety of equipment.</p> <p>Vermeer dealers offer a full service on all Vermeer products. This spans 15 Vermeer dealership groups and 150 dealerships locations across North America. Our dealership networks are trained to support all Vermeer products. Vermeer has built superior relationships with our vendors to help drive support across the US.</p>

Table 6A: Pricing (400 Points, applies to Table 6A and 6B)

Provide detailed pricing information in the questions that follow below.

Line Item	Question	Response *
55	Describe your payment terms and accepted payment methods.	Payment Terms are Net30. Cash, Credit, Financing and Leasing are available.

56	Describe any leasing or financing options available for use by educational or governmental entities.	A variety of leasing programs are available. This includes municipal leases as well as leases with different purchase options at the end of the term. Purchase Options using predetermined or fair market values can be used to customize payments to a member's budget and capital availability. Rates and terms can vary and be tailored to the member's needs and qualifications.	*
57	Describe any standard transaction documents that you propose to use in connection with an awarded agreement (order forms, terms and conditions, service level agreements, etc.). Upload all template agreements or transaction documents which may be proposed to Participating Entities.	Transaction documents will vary by dealer location, but typically a signed sales order and/or purchase order is acceptable	*
58	Do you accept the P-card procurement and payment process? If so, is there any additional cost to Sourcewell participating entities for using this process?	Since Vermeer dealers will be receiving payments directly from members, P-card procurement will be at their discretion and may vary from dealer to dealer.	*
59	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	Vermeer offers Sourcewell members a discount up to 14% for the offering in the Utility category. There is a pricing list included with the RFP that incorporates the appropriate and stated discount for each unit and options for each model. The price list utilizes model numbers and sales codes rather than SKU numbers. In order to determine total price, the Vermeer dealer will utilize the discounted amount on the price list and provide freight and prep depending on the model. We will continue to work with Sourcewell to refine this method if needed. See document: Pricing	*
60	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	Pricing is a percentage discount from list price ranging from 2% to 14% on equipment.	*
61	Describe any quantity or volume discounts or rebate programs that you offer.	Our dealership network has the authority to consider volume discounts, member loyalty and may offer additional discounts at their discretion. Please contact the appropriate Vermeer Dealer or the Vermeer factory team at government @vermeer.com to discuss.	*
62	Propose a method of facilitating "sourced" products or related services, which may be referred to as "open market" items or "non-contracted items". For example, you may supply such items "at cost" or "at cost plus a percentage," or you may supply a quote for each such request.	Sourced Goods or Open Market Items are available to members through Vermeer dealers. The pricing for the goods and services will be based on fair market value and determined between the customer and dealer. These products should be complimentary to the Vermeer equipment included in the Sourcewell purchase. These sourced or open item purchases will not be included on the Sourcewell sales reports.	*

63	<p>Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.</p>	<p>Equipment Parts- Vermeer Corporation at 1210 Vermeer Road East in Pella, Iowa is the sole source manufacturer of Vermeer Genuine Parts. The Vermeer dealership network is the sole source distributor for genuine Vermeer parts that are recommended for use on all equipment. The pricing should not exceed the suggested list price.</p> <p>There are some specific local and state taxes that might be included in the acquisition price from the dealer. Few examples are the following:</p> <p>RDO Pacific in Oregon has a state privilege tax of 0.5% on all towable equipment.</p> <p>RDO Vermeer Pacific in California, which is part of the Vermeer dealership network includes the following additional charges:</p> <p>CARB registration fee for any unit with a 50 hp engine and over. CARB is California Air Resources Board. This is government mandated. The dealership begins the registration process as soon as they can because the machine must sit until the registration process is complete or there is risk of being issued a citation. Tire tax of \$1.75 per tire. This is required for anything with tires.</p> <p>Registration fee for units that must be licensed and plated. This is done as a courtesy to the customer. If a customer prefers to take responsibility for this on their own, then the dealer does not charge a registration fee.</p> <p>While Vermeer historically implements any price increases on an annual basis. Volatility or changes in the procurement market like we experienced during and after COVID and new tariffs in 2025 can impact this schedule.</p> <p>A quote could include a pending or upcoming price increase if the machine is anticipated to be delivered after the increase is implemented as these costs are absorbed by our dealer network. These increases are capped at 4% per quarter and cannot be implemented more than 4 times in a 12-month period. This is consistent and included with our current contracts.</p>	*
64	<p>If freight, delivery, or shipping is an additional cost to the Sourcwell participating entity, describe in detail the complete freight, shipping, and delivery program.</p>	<p>The freight cost for each piece of equipment is determined by the dealer based on the equipment size and distance from the manufacturing location. The member's final price should be determined by using the contract price of the equipment and dealer freight and prep. This amount should be itemized separately and does not qualify for the model discount.</p>	*
65	<p>Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.</p>	<p>Vermeer dealerships covering Alaska, Hawaii, and Canada. The Vermeer dealer works with Vermeer Corporation's logistics team to ship the product from the manufacturing plant to their location. The dealer then preps and delivers the equipment to the customer. Freight/Prep costs can vary based on the distance from the factory to the dealer and any additional delivery fees such as port or other additional costs to delivery the equipment to the Sourcwell member.</p>	*
66	<p>Describe any unique distribution and/or delivery methods or options offered in your proposal.</p>	<p>Due to the nature of our product and business model, Vermeer is set up to distribute and deliver through the Vermeer dealership network including 150 locations in the United States and Canada. The service, longevity, and expertise of this dealership network along with the relationship with Vermeer Corporation is what makes it a unique distribution channel.</p>	*
67	<p>Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed agreement with Sourcwell. This process includes ensuring that Sourcwell participating entities obtain the proper pricing.</p>	<p>Each dealer can qualify for funding from Vermeer Corporation for products sold and delivered to Sourcwell members. To receive this funding the dealer must submit paperwork to the Vermeer Corporate Accounts Department, stating the Sourcwell program was utilized and who was the purchasing member. This paperwork along with submitted equipment registration is used as an accounting tool and in our audit process. Vermeer Corporation provides current contract pricing and instructions on our internal dealer website and schedules training sessions, allowing Vermeer to educate the Vermeer Dealers in the proper use and promotion of the Sourcwell program. The dealer submissions are reviewed on a monthly basis and reported to Sourcwell along with the administrative fee.</p>	*

68	If you are awarded an agreement, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the agreement.	Vermeer has a 16-year sales history with NJPA/Sourcwell, showing consecutive year-over-year growth. We assess our success by comparing it to the previous year's growth and tracking dealer engagement through quotes, sales, and training. Additionally, we use internal metrics to monitor purchases via Sourcwell or the bid process, helping us evaluate the effectiveness of our contract purchasing focus.	*
69	Provide a proposed Administration Fee payable to Sourcwell. The Fee is in consideration for the support and services provided by Sourcwell. The proposed Administrative Fee will be payable to Sourcwell on all completed transactions to Participating Entities utilizing this Agreement. The Administrative Fee will be calculated as a stated percentage, or flat fee as may be applicable, of all completed transactions utilizing this Master Agreement within the preceding Reporting Period defined in the agreement.	Vermeer Corporation proposes a 0.75% administrative fee to Sourcwell on monthly equipment sales. This aligns with our current Sourcwell contracts.	*
