CARS

# FCA gains, Ford and GM decline in survey

**Eric D. Lawrence**  
Detroit Free Press  
USA TODAY NETWORK

COVID-19 and the global downturn have hit car sales hard, but the pandemic isn't the only thing on the minds of new-car buyers.

Consumers are less satisfied in general with their rides, but among the Detroit Three, Fiat Chrysler Automobiles can tout some good news in the latest survey of customer satisfaction.

The American Customer Satisfaction Index shows that FCA, maker of Ram trucks and Jeep SUVs, actually improved its score compared with a year ago. That can't be said for either General Motors or Ford.

The survey is based on interviews with 10,414 customers, "chosen at random and contacted via email between July 1, 2019, and June 14, 2020," so the period covered also includes the initial months of the coronavirus pandemic.

"Looking at domestic automakers, customer satisfaction results are mixed as both Ford and GM show steep declines while Fiat Chrysler nets a gain. Ford falls furthest this year, tumbling

5% to 76 (on a 0-100 scale), the lowest score among the Detroit Three," according to the 2020 American Customer Satisfaction Index report being released Tuesday.

That result marks a turnaround for FCA, which had in recent years registered the lowest score of the three companies in the annual survey. FCA also saw a marked improvement from last year.

"A year ago, Fiat Chrysler was the biggest loser in satisfaction, but for 2020, the carmaker rebounds 3% to tie with GM at 77," the report said. "The improvement brings Fiat Chrysler ... in line with both GM and Ford for the first time in five years. While the company benefits from high and stable satisfaction for its Ram nameplate, both Dodge and the self-named Chrysler brand post positive driver satisfaction upswings this year."

Those improvements for Dodge and Chrysler should note that the two brands bring up the bottom of the list, but the Ram brand, which competes in the profitable pickup segment, is solidly in the top six, which includes Lexus, Audi, Cadillac, Mercedes-Benz and Toyota.

But among mass market brands, not counting luxury nameplates, Ram and Toyota are tops.

John McNichol of Glen Mills, Pennsylvania, is sold on Fiat Chrysler's products, although he attributes much of that to the relationship he has with his dealer, David Kelleher, president of David Dodge Chrysler Jeep Ram.

McNichol, president and CEO of the Pennsylvania Convention Center in Philadelphia, said he met Kelleher years ago at a fundraiser, and that Kelleher and his dealership have done everything right, including at one point talking him out of a more expensive Jeep Wrangler and into a Ram pickup that Kelleher said he knew would be more to his liking.

"I've got nothing but good things to say," McNichol said.

Although he used to be "agnostic" on car brands, McNichol, who has sent just about everyone he knows to his friend's dealership, has a mini fleet of FCA vehicles in his family now - a Dodge Durango, a Chrysler 300 and both sons drive Jeep Cherokees.

And then there's the 2019 Ram 1500 Limited.

"It is just a smoking hot truck," McNichol said. "I love it."

The Ram 1500 runs so much better than his one-time favorite vehicle, a GMC Yukon Denali, McNichol said. That Ram drives like a "great, upper-end SUV."

That's quite a testimonial from a current FCA customer.

For Ford, and to a lesser degree GM, the news from the survey was troubling.

"A sharp decline for luxury plate Lincoln combined with a smaller drop for the Ford brand pushes the company to a five-year low," the report said. "GM plunges nearly as far, down 4% to 77, beating Ford by a point. While GMC trucks hold steady for customer satisfaction, the company's Buick and Chevrolet nameplates both retreat to record-low satisfaction levels."

The declines, however, are not unique to GM and Ford, with 17 brands posting declines year over year. European carmakers hold a lead over Asian and U.S. companies.

"For both domestic and international carmakers, customer satisfaction is now at its lowest level in five years," the report said.

# Toyota's quick RAV4 plug-in hybrid is riding high

**Mark Phelan**  
Detroit Free Press  
USA TODAY NETWORK

Toyota dips a cautious toe into the electric vehicle pool - again - with the capable 2021 RAV4 Prime plug-in hybrid that just went on sale. Jump in. The electrons are fine.

As such brands as Audi, Cadillac, GMC, Ford and Volkswagen dive into the market for 100% electric vehicles, Toyota instead continues to refine and improve the hybrid technology that powered its massive sales surge in the early 2000s. The other giants see hybrids largely as a rest stop on the highway toward a future of 100% electric vehicles - a nice place to stretch your legs, with hybrids now receding in the rearview. Toyota is enjoying a picnic there, confident it'll catch up later.

For those of you who don't follow EV technology like it's the only sport on TV, the world's automakers have largely split into two camps as they work to reduce petroleum consumption and greenhouse gases:

- Some, led by Toyota, continue to invest heavily in developing new hybrids, vehicles that have both a gasoline engine and electric motors and batteries. Plug-in hybrids, such as the RAV4 Prime, get a bigger battery you can charge from an outlet to drive farther on electricity before you start burning gasoline. (Toyota has one vehicle powered by a hydrogen fuel cell, but it's an asterisk in a conversation about currently available technologies.)

- Other automakers have moved on to electric vehicles powered solely by batteries. Battery electric vehicles - BEVs - don't have a gasoline engine. They run purely on electricity, from a charging station or regular household

## Available safety features

- Collision alert
- Pedestrian alert
- Front and rear parking assist with automatic braking
- Lane departure alert and assist
- Blind spot and cross traffic alert
- Automatic high beams
- Adaptive cruise control
- Blind spot and cross traffic alert

2021 Toyota RAV4 Prime XSE Premium  
MARK PHELAN/USA TODAY NETWORK

current, though the latter takes 12 hours for a full charge.

Plug-in hybrids - PHEVs - like the RAV4 Prime are a midpoint between conventional hybrids and EVs. Their batteries are big enough to go farther on electricity alone - 42 miles in the RAV4 Prime, a distance that covers many people's daily needs. The gasoline engine kicks in for longer trips, or when charging from the regular power grid isn't available.

The RAV4 Prime is Toyota's second plug-in. The first, the Prius Prime, enjoyed modest success, with a correspondingly modest 25-mile battery range.

Toyota is developing BEVs, but conservatively, as usual.

## Driving impressions

The RAV4 Prime is one of Toyota's quickest vehicles. Its 5.7-second 0-60 mph time is tops among Toyota's four-door models. That's thanks to 302 total horsepower from its gasoline engine and electric motors. That's 99 more horsepower than the gasoline-only RAV4. The Prime also has more torque

than the gasoline model, though Toyota doesn't provide a specific figure saying that it's hard to figure out because of the complex interaction between gasoline engines and electric motors.

The RAV4 is Toyota's best-selling vehicle in the U.S. by a wide margin, and the country's top-selling non-pickup, so the Prime is kind of a big deal. Acceleration is strong, either in battery-only EV mode or using hybrid power when the engine and motors work together.

The steering is responsive and the brakes feel natural and are easy to modulate as they perform the complex ballet of combining conventional brakes and the electricity-producing regenerative braking that keeps the battery able to boost power and fuel economy after the all-electric range is exhausted.

The batteries and motors add about 810 pounds to the weight of a well-equipped model such as the XSE Premium I tested. Luggage space behind the rear seat decreases about 4 cubic feet to make room for the batteries but remains useful at 33.4 cubic feet with the large sun roof.

In addition to its 42-mile EV range, the RAV4 Prime gets an EPA rating of 54 mpg in combined city/highway driving using the gasoline engine. A complicated measure that aims to compare car-

bon emissions in all-EV mode to a traditional internal combustion engine checks in at a pretty good 133 MPGe.

A full charge will take 2.5 hours at 240v with the optional 6.6kW fast charger. A 3.3kW charger is standard.

The RAV4 Prime is comfortable and roomy, despite sacrificing a few cubic feet of cargo space to add batteries. Head and leg room are good.

The interior in my test vehicle was trimmed in soft black materials with red accent stitching. The controls were easy to use, traditional buttons and dials and a 9-inch touch screen.

Electric vehicles are required to emit a sound to alert pedestrians.

Toyota settled on a whale-song-in-distress note for the RAV4 Prime.

Maybe it'll grow on you.

## How much?

Prices for the RAV4 Prime start at \$38,100 for an SE model. All Primes come with a 2.5L engine and a hybrid system that uses an electric rear axle to deliver all-wheel drive. A continuously variable transmission is standard.

The upper trim level is XSE. It starts at \$41,425. I tested a loaded RAV4 Prime XSE with the weather and audio premium package. It stickered at \$47,185.

There's not a lot of competition for a compact plug-in hybrid, or PHEV, SUVs. The Ford Escape plug-in going on sale shortly is probably the most direct. Prices aren't available yet, but the EPA rated the Escape plug-in at 38 miles of battery range, 42 mpg city/highway on gasoline power and 100 MPGe.

The Mitsubishi Outlander PHEV scored 22 miles on battery power, 25 mpg combined and 74 MPGe. Prices start at \$36,395. All prices exclude destination charges.
